

# GN 2100

## Personal & superior

- **Superior concept** – luxurious design with head-band boom arm in a matt titanium finish
- **Ultra lightweight** – for all day comfort
- **3-in-1 design** – for your personal choice of wearing style
- **Wide range of accessories** – customise your headset
- **Perfect sound reception** – with 3 different types of microphones
- **Practical** – single cord entry

The excellent sound quality surpasses anything you might have experienced before in the way of a headset – which is why you will feel that GN 2100 brings you closer to the person you are talking to. GN 2100 gives you the feeling of being able to talk “face to face” on the telephone, and you will both discover a whole new sense of actually being there.

The attractive and unique 3-in-1 design takes personal comfort to a new level, allowing you to choose at any time the most comfortable wearing style – either a headband, SureFit earhook or adjustable FlexLoop.

But the flexibility doesn't end here, the GN 2100 offers you 3 different boom designs – the traditional Fixed-boom, the well-known Flex-boom or the brand new, ultra-stylish Micro-boom arm. You can also choose from 3 different microphone options – the standard, the noise cancelling (NC) and the ultra noise cancelling (UNC).

Thanks to the wide range of mix and match accessories you now also have the ability to customise your GN 2100 headset even further. Choose between 3 different sizes of earplates and earcushions. Or one of our four different clip-on colours, adding a whole new personal dimension, which is especially useful when organising people into individual teams in call centres or sales departments.

GN 2100 - the flexible headset that allows you to put your personality first!
