## PC USB adapter range

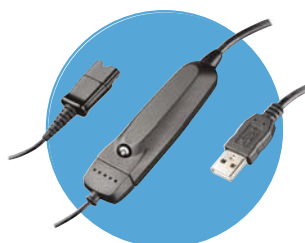

Add headset convenience and enhanced audio quality to VoIP SoftPhones.

Voice over Internet Protocol (VoIP) is the hot topic in enterprise telecommunications. More and more companies are realising the benefits of converging their voice and data traffic into a single IP network to reduce infrastructure costs and enhance flexibility.

With the expanding use of VoIP Softphones in the enterprise, there is a growing requirement for PC headset solutions which are specifically designed to stand up to the daily rigors of the office or contact centre environment. Most PC headsets available are designed for occasional or home use and do not fully meet this need.

Plantronics DA range of USB adapters are designed to PC-enable Plantronics professional grade headsets to be used on PC's for VoIP application. Professional grade headsets such as the SupraPlus™ have been specifically designed to meet enterprise customer requirements for robustness and all-day wearing comfort, as well as providing features such as acoustic shock protection.

DA40

DA55

DA60

### Key features

#### DA40: Entry level USB adapter

- USB connection
- provides universal compatibility
- allows PC speaker to ring for incoming calls.
- Plug and play – no software or drivers to install
- Compatible with all Plantronics professional headsets (H range)

#### DA55: Mid-range level USB adapter

- Same features as DA40, with the addition of:
  - SoundGuard Plus™ & Call Clarity™ for exceptional sound quality.
  - DSP Echo suppression improves VoIP quality
  - Inline volume and mute controls for convenient sound adjustment.
- Compatible with all Plantronics headsets (P or H range).

#### DA60: Premium level USB adapter

- Same features as DA55, with the addition of PerSono Pro™ software which provides:
  - Daily noise exposure monitoring to help track compliance with European noise exposure legislation

Allows PC speaker, not headset, to ring for incoming calls.	some	✓	✓
Replacement ear cushions & voice tubes available to maintain optimum hygiene	x	✓	✓
Stereo	✓	x	x

\*Acoustic Startle and Acoustic Shock Definitions

- Acoustic shock occurs at or above 118dB, as defined by EU telephony standards.

- Acoustic startle can be caused by sudden loud sounds, including those below 118dB. It is claimed such sounds can cause a range of undesirable symptoms in some people.

Plantronics professional telephony headsets include acoustic shock protection to limit sounds at 118dB. For customers – particularly contact centers – who seek additional protection from sudden loud sounds for their employees, SoundGuard Plus provides acoustic startle protection to further reduce the level of sudden loud sounds.

### System Requirements

#### Specification subject to change

PerSono Pro™ Software	PerSono Pro™ 2 Agent & Supervisor	PerSono Pro™ 2 Database Service	Description	Part Number

Sound Innovation™ for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man..." From the man on the moon to the man on the street, Plantronics is an innovation leader dedicated to creating communication solutions for people who understand and appreciate the real freedom of space. From outer space to inner space, find your space.
